The screenshot shows the web interface of the Rutoken VPN client. At the top left is the 'РУТОКЕН VPN' logo. To its right is a teal button with a gear icon and the text 'ДОСТУПНО ОБНОВЛЕНИЕ'. Further right, the user is identified as 'Пользователь: RutokenVpn' with a link to 'Завершить сеанс'. Below this is a navigation bar with three items: 'Пользователи и сертификаты', 'Сеть и система', and 'Управление устройством', each with a dropdown arrow. On the far right of the navigation bar is 'Рутокен VPN Клиент'. The main content area is titled 'ОПЕРАЦИИ'. On the left side of this area is a vertical list of menu items: 'ПАРОЛЬ АДМИНИСТРАТОРА', 'НАСТРОЙКА ВРЕМЕНИ', 'ОБНОВЛЕНИЯ', and 'ОПЕРАЦИИ'. The 'ОПЕРАЦИИ' item is highlighted in red. To the right of the menu is a text block explaining that any operation will reset current user connections and that the administrator will lose connection. It also states that after the operation, physical access to the device will be required for re-activation, and that a factory reset will delete all user data. At the bottom of the operations section are two red buttons: 'ПЕРЕЗАГРУЗИТЬ' and 'ВЫКЛЮЧИТЬ'.
